INSTALLER CERTIFICATION

AQIP Training

The # 1 cause of insulation failure is improper installation. Armacell understands that installing closed-cell foam requires a special skill set. That's why we developed the **Armacell Qualified Installer Program**, which provides free expert application training on Armacell's insulation systems.

Hands-on training includes:

- // How to properly cut, glue, seam and seal
- // How to custom fabricate fittings
- // How to use adhesives, tapes, coatings and pipe supports
