Armacell and ArcSite Partner to Simplify Turf Estimation

- ArcSite now includes ArmaComp ArmaSport® product in its library
- Launch of mobile drawing, material estimation for artificial turf contractors
- Access materials for mobile estimation and planning

Chapel Hill, NC, 3 February 2022 – Armacell, a global leader in flexible foam for the equipment insulation market and a leading provider of engineered foams, announced today a partnership with ArcSite®, a mobile estimating app that is affiliated with industry leaders and manufacturers, which now includes ArmaSport Turf Underlayment shock pad materials and built-in estimation tools in its product library to make on site estimating easier and faster. Artificial landscape turf contractors and sports field estimators can easily select a proven shock pad for exceptional sports field performance and consistent playing conditions.

ArcSite's mobile drawing and estimation app helps contractors design and quote jobs with efficiency and professionalism. With this new partnership, businesses can easily customize their ArcSite environment to include Armacell artificial turf shock pad products. Users simply add the products to their drawing and ArcSite automatically calculates the number of rolls required.

ArmaComp ArmaSport® turf underlayment shock pad provides smooth, flat coverage under synthetic turf field installations. Unlike fields that depend on infill material, ArmaSport installations provide protection across 100% of the field with no loss or migration of the cushioning material and no direct contact with the players. This means sports field designers can count on the same amount of shock pad anywhere on the field—all the time—ensuring a safer playing environment for the team.

For more than 35 years, Armacell's ArmaSport® turf underlayment shock pad has been the ideal turf pad to stabilize and cushion playing surfaces providing consistent shock attenuation across the field. Athletic programs trust the expertise Armacell brings to athletic directors, facilities managers, or turf professionals responsible for installing and maintaining premier synthetic turf fields.

ArcSite users can find more information about the Armacell/ArcSite partnership by visiting their website: <https://www.arcsite.com/partners>

ABOUT ARMACELL

As the inventors of flexible foam for equipment insulation and a leading provider of engineered foams, Armacell develops innovative and safe thermal, acoustic and mechanical solutions that create sustainable value for its customers. Armacell's products significantly contribute to global energy efficiency making a difference around the world every day. With more than 3,000 employees and 24 production plants in 16 countries, the company operates two main businesses, Advanced Insulation and Engineered Foams, and generated net sales of EUR 591 million and adjusted EBITDA of EUR 120 million in 2020.
