

Armacell's ArmWin® App is CSE Magazine Product of the Year Finalist

Consulting-Specifying Engineer Magazine announced that Armacell's ArmWin Insulation Thickness Calculator App is a finalist in their Product of the Year contest in the Apps for Engineers category.

Chapel Hill, NC – April 14, 2016 – Armacell is pleased to announce that *Consulting-Specifying Engineer Magazine* chose Armacell's ArmWin Insulation Thickness Calculator App as a finalist in their Product of the Year contest in the Apps for Engineers category.

Consulting-Specifying Engineer's Product of the Year (POY) contest is the premier award for new products in the HVAC, fire/life safety, electrical, and plumbing systems engineering markets. The annual reader-choice program was created to provide *Consulting-Specifying Engineer's* readers with information about the top new product in their fields.

In 2015, Armacell completely revised ArmWin, its technical calculation program and for the first time also provides ArmWin for use on mobile devices such as smartphones and tablets. This powerful tool can be used to carry out all the common technical calculations to help specifiers choose the correct insulation thickness for the Armaflex® family of products for use in refrigeration, HVAC and plumbing applications.

The online version is available at <http://armwinarmacell.com> and the apps can be downloaded from the App Store for Apple iOS smartphones, from Google Play for Android phones and from Amazon Appstore for Blackberry devices.

Voting to choose the top Gold, Silver and Bronze awards opens on April 14th and continues through June 30th. Only *Consulting-Specifying Engineer* readers who have the responsibility to buy and/or specify products will be invited to vote for the 2016 Product of the Year winners. Qualified CSE magazine subscribers can vote here: www.csemag.com/votepoy
